GAURAV PRAJAPATI

SDET / QA Automation Engineer

+91-8218158916 | gauravprajapati459@gmail.com | Gurugram, Haryana | LinkedIn | GitHub | LeetCode

SUMMARY

SDET with nearly 2 years of automation experience across e-commerce and enterprise retail. Builds Playwright test frameworks, runs API, SQL and k6 performance testing, and owns sprint QA from test planning to release sign-off. Also built Selenium test suites and business process automation that saved 1,600+ hours of manual work a year.

TECHNICAL SKILLS

Test Automation: Playwright, Selenium, TestNG, Page Object Model, Cross-Browser, Regression and E2E Testing
API & Data Testing: Postman, REST APIs, SQL, Snowflake, MySQL, MongoDB
Performance Testing: k6 (load, stress, spike and soak testing)
Languages: JavaScript, TypeScript, Java, Python, C++, C#
Process Automation: UiPath, SAP, Excel, Outlook and web workflow automation
Tools & Process: Git, GitHub, Jira, Spira, Jenkins, CI/CD, SDLC, STLC, Agile
AI: Generative AI, Agentic AI, Prompt Engineering, Claude, GitHub Copilot

EXPERIENCE

Infinite Locus — *SDET, Gurugram* **Jan 2025 – Present**

- Built and maintain a Playwright automation framework with Page Object Model, fixtures, reusable helpers and API checks, running cross-browser regression suites in the CI/CD pipeline.
- Own QA for **TenxYou**, a D2C e-commerce platform co-owned by **Sachin Tendulkar**, covering the Saleor backend, GoKwik checkout, payments, returns and exchanges, ERP inventory sync and GA4 event tracking.
- Write and maintain detailed test cases and test plans, and handle regression, defect triage in Jira and release sign-off each sprint.
- Ran load, stress, spike and soak tests with k6 to find slow endpoints and capacity limits before high-traffic releases.
- Test REST APIs in Postman and validate data with SQL and Snowflake to confirm the UI, API and database stay consistent.

Victoria's Secret & Co. — *Automation Developer (Contract)* **Jan 2025 – July 2026**

- Developed and maintained Selenium, Java and TestNG automation scripts for the Active Omni order management platform.
- Automated end-to-end workflows across SAP, web applications, Excel and Outlook, saving 1,600+ hours of manual work a year.
- Built a document processing automation that reads incoming emails, extracts PDF data with OCR and updates trackers automatically.
- Debugged failed automation runs in production and improved exception handling, retries and logging.

PROJECTS

E-Commerce Test Automation Framework | *JavaScript, Playwright, Selenium WebDriver, Mocha, GitHub Actions*

- Built one test framework in JavaScript that runs end-to-end tests for login, product search, cart and checkout on a demo e-commerce site with both Playwright and Selenium WebDriver.
- Used the Page Object Model with shared page classes, test data in JSON and reusable helpers, so a page change needs a fix in only one place.
- Ran tests in parallel across Chromium, Firefox and WebKit, with screenshots, videos and traces on failure and HTML reports per run.
- Set up a GitHub Actions pipeline that runs the full suite on every push and pull request.

EDUCATION

MCA, Harcourt Butler Technical University (HBTU), Kanpur | *CGPA: 8.54 / 10* **2025**

B.Sc. Computer Science, Bhavan's College, Mumbai | *CGPA: 9.43 / 10* **2022**

ACHIEVEMENTS

- Saved 1,600+ hours of manual work a year through automation at Victoria's Secret & Co.
- Solved 600+ DSA problems on LeetCode; 5-star rating in Problem Solving and C++ on HackerRank.
- Built a programming blog to 15,000+ monthly visitors at peak, with Google AdSense and Ezoic approval.
- Open-source contributor, Hacktoberfest 2023.
